

## COP 5611 - JPM Project - Meeting Minutes

---

Date: 2003.04.03

### Meeting Minutes

- Willard and Chuck met in the Security Lab for about 8 hours to work on the JPM project.
- Chuck and Willard discussed progress made on the JPM Logger code and the JPM infra-structure. The next development action items were established.
- An important decision was made to focus on finding performance improvements using logging only. The process caching and the process scheduling have been deemed to be future work at this point so that the end of the semester deadline can be met.

### Action Items

- Willard is going to start writing the paper.
- Chuck is working on finishing the final issues with the complete JPM application.
- Chuck will start to design the JPM experiments.
- Next meeting scheduled for Friday, April 9, in the security lab.
